November 17, 2014

Some homes within the Neenah City limits may have elevated lead levels in their drinking water. Lead can pose a significant risk to your health. Enclosed are copies of a brochure, which provides general information on lead in drinking water.

The United States Environmental Protection Agency (EPA) and the Wisconsin Department of Natural Resources (DNR) have requested that the Neenah Water Utility provide these brochures to all public and private schools, the local school board, the local Head Start and WIC Programs, local hospitals and clinics, pediatricians, family planning clinics, and local welfare agencies.

The brochures are to be distributed to families that may drink or cook with Neenah water. Most families within the City limits have or will receive a copy of the brochure. Distribution through your office allows us to reach those families that live beyond the City limits, are new to the City, or may not have received a copy in the mail.

If additional brochures are needed, please contact the Neenah Water Utility at 920-886-6180.

Sincerely,

Kent Taylor, Director
Neenah Water Utility
